

DTM by Confidex™

The Desktop Ticket Machine for Contactless Media

Ticketing and Vending Machine in one package!

Emerging, innovative DTM by Confidex™ offers you full smart ticket personalization capabilities on-the-go, on-site:

Flexible artwork color printing

- First device in the market printing full color paper tickets
- Personalization of the artwork by adding barcode, text or chip number
- The operator can change the graphic/fare at any time

Cost effective operations

- Enable low cost ticket distribution to remote locations of the network
- Lower printing costs in comparison to card printing costs
- Reduced inventory expenses
- A single machine is able to release any kind of ticket: Transport, City card, Museum entry, Access pass...

Extra revenues

- High printing quality enabling contextual and dynamic advertising

Optimal security

- Encoding is performed during the issuance of the Fare Media thus reducing fraud and theft risks

The only *Desktop Ticket Machine* providing full contactless media personalization capabilities into your hands!

***Be among the first to enjoy
the benefits of Smart Tickets on-the-go!***

**>> Take part to dedicated
Confidex DTM Pilot Program.**

***The DTM Pilot Program is an opportunity
to accelerate safe DTM integration.***

It is a dedicated field testing period to evaluate the need of technical support and improve the product performance in accordance to customer's needs.

By partnering, you will get:

- Installation on-site, if needed
- Dedicated technical support
- Product upgrade at release 1
- Feedback survey after 1 month of usage

**Confidex development based on
pilot partner's feedback:**

- Evaluate technical support needs
- Operate small scale tests
- Test the device adoption and design ergonomics
- Gather customer feedback
