Operating temperature
- -20°C to +70°C / -4°F to +158°F

Peak temperature
- -20°C to +100°C / -4°F to +212°F for 15 minutes

Ambient temperature
- -20°C to +70°C / -4°F to +158°F

Water resistance
- IP68

Chemical resistance
- No physical or performance changes in exposure of:
  - 168h Salt water (salinity 10%)
  - 168h NaOH (10%, pH 13)
  - 168h Motor oil
  - 24h Water solvent metal machining fluids
  - 24h Cutting and grinding fluid
  - 24h Neutral industrial cleaning agent
  - 24h Cleaning agent for metal machining
  - 24h Siloxane based antifoam agent
  - 24h PH adjuster
  - 1h Acetone

Expected lifetime
- Product is designed for long life cycle in manufacturing control applications. Expected lifetime is years in normal usage.

Values in the table are the best recommendations; resistance against environmental conditions depends on the combination of all influencing factors, exposure duration and chemical concentrations. Thus, product’s final suitability for certain environmental conditions is recommended to be tested. Contact Confidex for more specific information.
PERSONALIZATION OPTIONS

Pre-encoding
- Customer specific encoding of EPC or user memory. Locking permanently or with password.

Customized laser engraving
- Customer specific layout with small amount of characters. Can be numbers that correlates with written RFID memory

INSTALLATION INSTRUCTIONS

Confidex X-Bolt™ can be attached by screwing it to M8 thread. Please contact Confidex in case other thread is needed. It is also possible to modify the bolt mechanics in case needed for automatic application machines.

Circular polarization of tag ensures that Confidex X-Bolt™ can be identified in all orientations with constant power level. This helps the installation as the orientation does not affect the read range.
